Data Solution

Employment Type
Full-Time

Minimum Experience
Entry-level

We are seeking experienced **Database Administrator (IT)** to join our team. Our DBA works all aspects of database administration including design, install, implement, monitor, maintain, tune and improve performance based on **Oracle** and **MS SQL Server database** for enterprise clients in different industries. The ideal candidate should be self-motivated, service-minded with positive attitude towards professionalism and teamwork.

Responsibilities :

- Administer all aspects of MSSQL/ Oracle databases including design, install, implement, monitor, maintain, tune and improve performance to meet clients' needs
- Provide database solution, implementation and configuration
- Perform database monitoring and performance tuning as well as SQL optimization
- Implement solutions for managing Backup, Replication, High Availability (HA), Disaster Recovery (DR)
- Standby 24×7 on-call customer support in case related to SQL Server / Oracle databases
- Performs general-to-advanced database issue troubleshooting
- Provide recommendations and improvements for healthy and secured database for each customer's environment

Requirements :

- Bachelor's degree in Computer Engineering, Computer Science or related discipline
- Preferred 2–5 years of experience; however, candidates with 1–2 years of experience or **fresh graduates with strong academic records and relevant internship experience are welcome to apply.**
- Experience using MSSQL or Oracle or PostgreSQL
- Knowledge in No-SQL DB like MongoDB or Redis will be big plus but not mandatory
- Strong SQL fundamentals
- Solid understanding of infrastructure, network and OS (Linux/Window) systems
